San Francisco, June 8 .- [By the Associated Press.] Late Saturday evening a serious cutting affray occurred outside the boathouse of the San Francisco Yacht Club, as a result of which Prescott Sawyer, son of Judge Lorenzo Sawyer of the United States Circuit Court, passed the night in Sausalito Jail. He was charged with feloniously cutting and wounding Herman Frantz, lately bookkeeper at the club, and at one time in the employ of young Sawyer, who was owner of the yacht Linda.

LYNCHING FEARED. So intense was the popular feeling Sawyer was removed to jail by C ble Creed, who passed the night with him, in strong apprehension of the

arrival of a lynching party. VERSIONS OF THE AFFAIR. From the testimony of impartial witnesses it appears that an altereation took place between Sawyer and Frantz. consequent on the former peremptorily ordering Frantz from the club's wharf It is claimed by the friends of Sawyer that Frantz struck him a heavy blow on the head, and that Sawyer, being the weaker, drew a pocket-knife and ent Frantz in three places.

The witnesses are by no means ready to support this theory, and aver that Sawyer struck the first blow, and that he sustained no injury whatever in the conflict with Frantz, while Frantz was picked up bleeding and searly dead.

SEVEN SMUGGLERS ARRESTED IN NEW YORK.

The Police Say the Capture of the Goods Will Cause a Sensation.

By Telegraph to The Times. NEW YORK, June 8.—[By the Assoclated Press.] Five men are now in Ludlow-street jail and two more men are out on bail on charges of smuggling. Those in jail are John Hart, John Hughes and John Baker, petty officers on the steamer City of New York, and John Lothin, head bar-keeper, and John Murdock, ship storekeeper of the City of Chicago, Those out on ball are Edward Baxter, a dock clerk, and John Ford, chief cooper, both employed by the Inman line at

Inter City.

The specific there years Lothis and Lardock is that on May 13th last, they brought into Jersey City a lot of ready-made clothing on which they evaded the duty. Their arrest would have been made then, but the yessel sailed before the matter could be brought home to the pair. Hart, Hughes and Baker are said to be wealthy Liverpool citizens, who made comfortable furtunes by just such practices as that for which they are now under arrest.

"The men who did the smuggling we've got," said inspector Britton today, "but the receivers are those we are after, and the public will be greatly surprised when it learns who and how many are concerned in the matter."

Four of the Inman steamers are now in trouble in connection with smuggling. They are the City of Chester, City of New York, City of Berlin and City of Chicago.

A Struggle for a Pistol that Resulted in Death.

SACHAMENTO, June 8.—[By the Associated Press.] Last night a young colored man, named Whitkaer, and his wife were about to enter a buggy in front of their residence to go to a moonlight picnic in the suburbs. The wife put her hand into her husband's cost pocket, and, finding. two feet. Striking nead foremost he was rendered unconscious by the shock. On examination it was found that his spine was seriously injured. He had no feeling in his lower limbs below the waist. Concussion of the brain resulted from the shock.

Construction Train Wrecked. GONZALES, June 8.— A north-bound special construction train of ten cars of gravel was ditched at Chualar, six miles north of here, last night. The engine, tender and seven cars went down a bank 25 feet. The engine was almost entirely demolished. Engineer White had his shoulder dislocated and was otherwise injured, but not fatally. The cause of the disaster was an open switch.

The Abductor Overtaken and Shot by His Wife's Brother.

Dominion Laws Invoked to Secure the Child's Release from a Convent Where the Kid-naper Placed Her.

By Telegraph to The Times.

MONTREAL, June 8 .- [By the Associated Press.] A sensational shooting affair occurred at 4 o'clock this afternoon on St. Catherine street, as a result of which Eugene Cowles, son of the late Edmund\_Cowles, the wellknown editor of Cleveland, O., lies at the General Hospital with a bullet wound in his neck, which may result in his death.

Cowles and his wife, who is a daughter of Mr. Hale, a wealthy Cleveland banker, have not been living together for some time. Cowles has been in business in Lockport, N. Y., and, his health failing, he determined to go on a trip.

ABDUCTING HIS DAUGHTER. He made a visit to Cleveland to see his mother and friends, and on leaving there last Monday took with him his 10-year-old daughter Florence, un-known to her mother. The child's absence was soon discovered, and a search was begun. When Mrs. Cowles learned that her husband had taken the child she at once began a suit for divorce, and an order was issued by the Court giving her possession of the child pending the hearing of the case. MRS. COWLES IN PURSUIT. Cowles had gone to

Cowles had gone to Toronto, and thither went Mrs. Cowles, accompanied by her brother, elster and attorney, Judge Ingersoll of Cleveland. When they reached Toronto they found that Cowles had gone to Montreal, taking the child with him. He had previously said he was willing to have an interview with his wife, but would talk with no one else. It is alleged that his object was to obtain an additional allowance. Four months ago, on the death of his father, he was cut off with an allowance of \$2500.

Cowless Dissipated asserted, he had been living at a fact rate in company with a woman of questionable character named Clara Lieneuschlows. She is at present at St. Catherines, having followed Cowless there from Buffalo.

Cowless has been twice to Europe by her brother, eister and attorney,

Buffalo.

Cowles has been twice to Europe with the woman, and on one occasion had to cable to his wife to come to his aid. She did so, but when he recovered from his illness he left her and ered from his liness as left her and returned with another woman to America. On another occasion he lived with her in San Francisco, they occupying adjoining rooms, and he al-leging that she was his widowed sister.

PUT THE CHILD IN A CONVENT. The pursuing party arrived at Mon-

stated above.

The doctors tonight think Cowles not in danger. Sympathy here is all with Hale and Mrs. Cowles, and it is believed Cowles intended to kill her. Hale is in prison. Judge Dugan will issue a mandamus tomorrow to get the child from the convent, when a guardian will be appointed.

Killed His Brother's Murderer. Dansville (Ky.,) June 8.—A year ago last February a negro named Riffe ago last repruary a negro named Kiffe killed Alonzo Brown in a fight. Riffe was tried six months ago, but the jury disagreed. During his second trial yesterday Lawrence Brown, brother of the deceased, stepped suddenly up behind the prisoner and shot him dead. He was arrested and pleaded insanity. All Settled Up.
PROVIDENCE (R. I.,) June 8.—The

transfer of all the property of the Riverside and Oswego Mill Company in

this city has just been made by trustees, who were selected at the creditors' meeting, held here last fall. The creditors' matters have been settled up, and a new company organ-ized. Attempted Suicide. SACRAMENTO, June 8.—Tonight Waiter W. Phillips went to the resi-dence of his wife's father, and when

he reached the front porch he shot himself in the right breast with sui-cidal intent. He is still alive and may recover. Despondency over trouble with his wife was the cause.

Kinney Will Lecture.
SAN FRANCISCO, June 8.—Abbot
Kinney of Los Augeles, well known as an enthusiastic advocate of the Australian ballot system, is in the city. He comes expressly to deliver a lecture on ballot reform before the Young Men's Democratic League on Tuesday

Merced Republicans.
MERCED, June 8.—The Republican County Central Committee met yesterday, and issued a call for primaries to be held July 19th. The county con-vention will be held at Merced July

26th. Flouring Mills Burned.

LAKE CITY (Minn.,) June 8.—T Boston flouring mills were burned this morning. The loss is \$100,000.

FLYERS OF BALDWIN AND HEARST

The Toboggan - slide Handlcap-Events Across the Ocean-Pug-listic Points-Some Bruis-ers and Their Work.

Our California racehorses on eastern tracks appear to have at last struck their winning gait. Lucky Baldwin broke the ice with Sinaloa II., who won the Ladies' stakes at Morris Park, New York, and broke the record for

the distance, 11-16 of a mile.
Senator Hearst won a race last week with that game filly, Gloaming, and on Saturday last King Thomas ran second. Saturday last King Thomas ran second.
This is the horse that brought \$40,000
as a yearling, the highest price ever
paid for a colt. He proved to be a
failure, however, never winning a race;
but of late he has rounded to, and if he
continues to improve, may yet justify
the wisdom of Senator Hearst's pur-

continues to improve, may yet justify the wisdom of Senator Hearst's purchase.

Theodore Winters also won second money with Average, on Saturday at St. Louis.

The Suburban handleap at Coney Island will be run this week, and will prove of great interest to the entire country. Tenny, who won the New York Jockey Club handleap at Westchester, is the favorite, and his owner, D. T. Pulsifer, has every confidence in his little horse's ability to win that great event. Gorgo, belonging to Senator Hearst, is also entered and may possibly carry off the prize. Last year it was won by August Beimont's Raceland, with Gorgo second. It was claimed at that time that Gorgo ought to have won, but owing to McLaughlin's careless riding the race was lost. The following description of the Toboggan silde handleap, recently run at Morris Park, is taken from the New York Sporting World, and shows how the California mare Geraidine lost the race and \$20,000 for Porter Ashe.

At the post a delay of nearly a quarter of an hour occurred and when Mr. Caldwell

the California mare Geraldine lost the race and \$20,000 for Porter Ashe.

At the post a delay of nearly a quarter of an hour occurred and when Mr. Cald sell nodded Geraldine was the fifst to move-followed closely by Fides and Forest King, Stridesway, with Garrison up, being just a trifle slow. Down the hill they came teeming like sheep through an opening in a fence, and at the furiong they were pretty west bunched, with Porter Ashe's cherry jacket in front, and racing after the California mare, like bounds after a stag, came Fides. Worth and Cassius, with all the others close up. Half way down and a yell from the stand proclaims that the Beaverwyck jacket is in front, but little Bunn's arm is seen to go up and the winner at Brooklyn falls back into the rack a beaten horse. Here Tormenter shoots past him and challenges the leaders, but it is only for a fer harifs had he, too, falters and is numbered among the deteated ones. Now it is a battle of the queens, and down to the stand come Fides and Geraldine, with the race all to themselves. "Geraldine in a waik," "Geraldine wins," is the cry that fairly shakes that massive grand stand and rolls like distant thunder away over the green field; but McGarthy is on the extreme outside, and, evidently thinking he has the race in hand, is tooking over his shoulder at the flying actuation behind and on all sides of him. Not as Hamilton, however, for with shoulders and head bent he came riding like a demand the stand come fiding like a decimal blee to the rail—riding as one

H. Fizsimmons, the Australian, who recently defeated Billy McCarthy who recently defeated Billy McCarthy in San Francisco, is regarded as a middle-weight wonder. He has an immense reach, which, added to his science, makes him a very formidable fighter. McCarthy was unable to reach him, owing to Fitzsimmons's superior reach, and the whole contest demonstrated the fact that because two men are of the same weight it doesn't n-cessarily follow that they are evenly matched. McCarthy is a good game fighter and in a fight with an opponent nearer his size will prove a winner.

After the Sunday Closing of Saloon In Cincinnati.

Never in the history of the city have we enjoyed so quiet a Sabbath.—[Her-ald and Presbyter. ald and Presbyter.

It has been years since Cincinnati has known so quiet a Sunday as today. So few drunken men have not been seen for months, and the police had little to do all day.—[New York Times telegram from Cincinnati.

Cincinnati is attaining a rare and honorable distinction among large cities by its zeal in enforcing the Sunday laws.—[Chicago Advance.

The Sacramento Record-Union points out that if the constables did their duty in arresting and prosecuting violators of the game laws they might derives fair income from fees and the flues imposed, and the game of the State would be preserved for future generations. Hunting tramps is more to the taste of the average constable, however.

THE PLOT THICKENS.

Ab Him in Jail - His Child Sent
Away.

As stated in The Times yesterday
morning, a warrant was aworn out in
San Francisco Saturday for the arrest
of Ah Him of this city on the charge
of bigamy. The warrant was sworn
out by Ruth Wah Tuong Ching, sister
of Tuong Ah Ching, wife No. 1
of Ah Him, who is now in jail
charged with larceny. The warrant
was issued by Judge F. W. Van Reynegom of the Superior Court.
Chief of Police Crowley of San Franclaco telegraphed the fact to Chief of
Police Glass of this city that the warrant was issued Saturday, and later
on the warrant was telegraphed to
Chief Glass, and he detailed Detective
Aubie to make the arrest. Judge Van
Reynegom placed Him's bail at \$4000.
Him did hot give bail, and was
placed in the City Prison. To a Times
reporter yesterday he stated that he
thought he could disprove the charge;
he was sorry that his wife was arrested, and that he would use his influence with Sing, the complainant, to
withdraw the accusation this morning.
Him was very sick and penitent. He
will perhaps be sent to San Francisco
today for trial.
From the City Jail the reporter visited the County Jail to see Him's wife,
but she had retired. The littile 12-year-old child was sent
to San Francisco yesterday afternoon by Miss Worley, under
charge of some of the San Francisco.
Chinese Mission people. Miss Worley,
who came on behalf of the Mission,
stated that the child was perfectly
willing to go, and that the mother was
also anxious to go to San Francisco.
There is considerable excitement in
the Chinese quarter over the matter,
and the friends of Ah Him state that
they intend swearing out a warrant against those who took away
the child, charging them with
the crime of kidnaping. Ah Him has
not yet been informed that his child
has been taken away.

It is likely that, at the instance of
Ah Him, the charges against the
woman who claims to be his wife will
not be pressed.

DEAD IN HIS SHOP.

Leon Bueaud, Barber, Dies Suddenly on His Doorstep. The landlord of a little lodging-house on Aliso street, between Los Augeles and Alameda, was somewhat sur-prised yesterday when he stepped out of his door and saw a dead man leanof his door and saw a dead man leaning against a door of an adjoining building. It was Leon Bueaud, a barber, sitting down on the steps and leaning back against the door of his own shop. He was dead. Deceased was subject to paralytic strokes, and the verdict of the Coroner's jury was to the effect that he died from paralysis. He was aged 58 years and unmarried.

Wants to Get Back.

Edward Frazer, a wealthy lumber-man of Marquette, Mich., after spend-ing a winter here, returned to his former home, and writes to the Ontario Record as follows:

Record as follows:

"I find it more difficult to adapt myself to this disagreeable climate each time I return. There has not been one day of pleasant, warm weather since my return, May 3d, and three snow storms in that time; and last night a perfect blizzard, ice freezing half an inch thick. It is the coldest May in twenty years. Shall be glad when I can pack my trunk for my return, which I hope will be in a few weeks—as soon as winter's work is settled up and some buildings I am erecting are completed."

#### FIELD FIRES.

#### Their Hot Work During the Hot Days.

EXTENT AND DESTRUCTIVENESS

The Sisters' Hospital in Jeopardy-Close to the City—The Raymond and South Pasadena—West of Town—Damage Serious.

The brush fires and grain-field fires that have been raging in the vicinity of Los Angeles during the past three days had about died out yesterday, and the chances are that but little more damage will be done. At several points to the west of the city the grass fires threatened, on more than one occasion, to do considerable damage to residence property, and had it not been for the prompt action of citizens and squads of men who were sent out from the city there is no telling where the fire would have stopped. At one time it reached a point within a few yards of the Sisters' Hospital, and the building was only saved by the determined action of about fifty men, who fought the fire with wet sacks, etc., during the greater part of Saturday and Saturday night. From this point the fire swept around the hills and came up to Buena Vista street, threatening to get into the old cemetery.

The Raymond and South Pasadena had a narrow escape from the fire which broke out Thursday on the Arroyo Seco, near the line of the Santa Fé road. General Manager Wade of the Santa Fé was notified of the danger to property in that section, and he prom thy sent out about sixty men, armed with wet blankets and sacks. They were on their feet fighting the flames sixteen or seventeen hours, and finally got them under control.

The country west of the Southern Pacific's Santa Monica line has suffered considerable damage during the past few days. All day yesterday squads of men were out guarding grainfields. Quite a number of acres of barley were swept by the fire, and two or three hay-fields suffered more or cless. There was one farmhouse burned near the Sunset Hotel, and a couple of stables on Twenty-seventh street were burned to the ground.

It is not known how so many fires were started at about the same time in various places, and no one seems to know whether an investigation will take place or not; but it is probable that the insurance companies will have something to say when they come to settle up. As the most of these fires have started on the line of the railroads, it is

In addition "the week's wash" of about thirty families was burned. Some of the washing had been "done up" and was ready for delivery on the horrow, and about half of the dirty linen that was being washed had been gathered that morning. The clothing lost was valued at about \$200, making the loss to the Chinese laundryman about \$500.

It is supposed that the fire originated by means of a heated stove.

There was a deficiency of water in the fire-plug, or else the department would have saved the cottage.

- "ONE-ARMED PETE,"

The Mystery Surrounding His Case Not Cleared Up. The mystery that has surrounded the assault on "One-armed Pete," the other night, is growing day by day. At first it was thought that the two men who visited his place and came near beating him to death, were there for robbery only, as they ransacked the house and left their bloody finger-marks on various articles. This theory was on various articles. This theory was knocked in the head, however, when Sheriff Aguirre discovered that the would-be murderers did not touch a cent of money, although there were several sums in plain sight. The officers then concluded that there was a woman in the case, but they could only get Pete to say that he had settled his woman scrape. He would not give her name, and no one knows who she is, if there is such a person. At first Pete declared that he did not know who attacked him, but he now says he can identify at least one of the know who attacked him, but he now says he can identify at least one of the men and that he knows his name, but he refuses to give it up, and the officers are at a loss to know what to do in the matter.

He was resting easier yesterday and his chances for recovery were better than at any time since he was

A Flame of Oil. Last evening about 9 o'clock a brisk blaze was seen near the Santa Fé rail-road depot. It was the little oil and tool house just in the rear of the depot, where oil and tools were stored. About two barrels of oil went up in a blaze. The fire department responded, but the blaze was soon out.

A few days ago the chief engineer of the Union Pacific, who is in charge of the surveying parties now working between this city and Ludlow, on the Atlantic and Pacific, was instructed from headquarters to finish his work and close up the gap between Banning and Ludlow as soon as possible, and to send the maps and data to the main office without delay. He was also instructed to give them all the information possible regarding a route from Banning through Riverside into Los Angeles. As soon as this work is com-Angeles. Oregon with his crew of twenty-four men.

The chief engineer informed several citizens of Banning that he will have this work completed in less than thirty days. He is confident that tracklayin this side of Ludiow will be commenced before fall, and if that is the case Union Pacific trains will be running over their own track into this city much sooner than many people have thought.

Notwithstanding the fact that the Union Pacific engineers have given out that they are going direct to Oregon, it is more than probable that they will do some surveying from Mojave along the west line of the San Joaquin Valley to San Francisco. The Union Pacific and the Santa Fé people are doing all in their power to keep the people in the dark regarding their joint extension of the Atlantib and Pacific, but everything tends to show that they intend to complete this line as soon as possible.

Tremendous Crowd and Crush at the Seaside Yesterday.

SANTA MONICA.

June 8.—[Correspondence of The Times.] All day long those who were exhausted with the heat of the city, and some who were not, were coming to the seaside to get a whiff of fresh air. Every train was more than full, and before the lo'clock train arrived there was an old-time Santa Monica crowd congregated on the beach, and, in fact, scattered all over town. The bathnouses were besieged by a merry, jostling throng, who were anxious to get suits. After they had enjoyed the fuxury of the sait water for a few minutes, they began to play pranks on one another, and to the onlooker it was as good as a circus, only better, in fact, there being no admission fee charged. Quite a number of fair damesels brought down their bobt-tailed suits, and surely "Solomon in all his glory was not arrayed like one of these." The fast are, one was hardly arrayed at all, end the small boy keptyelling, "where did you get that suit?" to the amusement of the observers. The wharf was lined with fishermen, and when one caught a fish he was cheered by the whole concourse. The fish were scarce, but the enthusiasm was plentiful. McGinty was have, arrayed in his best suit of clothes, and earnestly looking for Annie Rooney, who was strolling on the beach.

The bathhouses were unable to keep up with the rush for suits, they all being out in the forenoon, and those who came later had to nut up with wet ones, which was willingly done, the cry being, "A suit, my kingdom for a suit!"

The restaurants and other resorts were ilberally patronized, and the 15-cent confee house was early in the forenoon, and those who came later had to not up with wet ones, which was willingly done, the cry being, "A suit, my kingdom for a suit!"

Merced county will not depend upon reisins for her future. We can grow and put into the market here as fine raisins as any place in the world, but it will not do to est one loaf when there are many to choose from, all of them good. The big four of our future will undoubtedly beraisins, olives, figs and oranges, either of the three last named cutting more of a figure than the first in the total revenue of our county. There can be no such thing as an over-production of figs. The world has really only a fraction of the clives which it really needs for consumption. Oranges ought in the United States to be a common food, and at one-fourth the present price. California could grow all the oranges for the rest of our country. And in doing so our orange-growers would make good interest on \$500 per acre. Prunes, almonds, wainuts and a hundred other different kinds of fruits can be grown newhere else. People will always talk of over-production. If these same people had not over-production to talk about they would nave something else over which to feel miserable.

The village was crowded with church attendants, it being feast day, church attendants, it being feast day, and, consequently, the excitement was more intense. "Yorba has shot Figueroa!" soon passed from mouth to mouth, and numerous were the questions as to the cause. WHAT is said to have been the first lot of wheat of the crop of 1890 in the United States was brought into Pho-nix, Ariz., by Pima Indians on the 2d

THE San Francisco Report has run the railroad bonus for a competing line up to over one hundred thousand dollars. This is quite a good example of newspaper enterprise.

THE Trombone states that two morn ing papers of Los Angeles are support ing Stephen M. White for Senator. One of these is, of course, the Herald the other must then be the 'Bone. Mr. White's friends ought to feel alarmed

BUILDING, it is said, is at present greatly slackened in some of our east ern cities by the fear of labor strikes This works greatly to the injury o both capital and labor. When will the world learn that capital and labor are mutually dependent.

THE condition of things on the Lower California border is alightly nore quiescent—enough so, at least, to sermit leaves of absence to some officers of the Army of Coolination in San Diego. The main body is, however, the ping on the arrums.

LONDON seems to be the Mecca Americans this year, It is said to be overflowing with them. When will the good people of this land be sensi ble enough to declare against going abroad till they have seen something of the wonders of our own continent?

An investigation has shown that some of the wails of the San Francisc City Hall, supposed to be solid brick, are filled with sand and rubbish. These were to support heavy iron girders and a tower. Surely, such criminal fraud will not be so easily condoned as is usually the case with municipal jobs in this country.

THE New York Saturday Review thus comments sarcastically upon a recent action of Walt Whitman, the

'good gray poet'': Walt Whitman se "good gray poet":
Walt Whitman sent a piece of arbutus
to the Queen for a birthday present, tor
which he will probably receive a letter from
Sir Henry Ponsonby to put among his collection. Mr. Whitman also sent some
verses, but omitted to say in what corner of em the poetry was to be found. The sion may cause trouble.

On Thursday last Ventura cele brated with much enthusiasm the cen tenary of José de la Rosa, a resident of that place, said to be the oldest printer in the world. The old gentle-man appeared on the stage of the hall where the meeting was held, and sang, in a good voice, a Spanish song, accompanying himself on the guitar Señor de la Rosa was born in Los Angeles, Mexico, on January 5, 1790.

THE back of the hot spell has been broken. The cool breeze from the ocean is wonderfully refreshing. After all, an occasional three or four days of such weather as we have just experienced is as nothing to the sweltering months of humid heat which residents of eastern cities have to undergo. A similar rise of temperature in cities on the Atlantic Coast always causes a large increase in the death rate, while here it is doubtful whether one death can be attributed to the late warm spell.

THE San Francisco Bulletin wants to know whether there is any method by which the moral tone of the Legis lature can be improved. It takes rather a gloomy view of the question, and says that, under the system of politics which now prevails, no man can be elected to the Legislature, espe cially from San Francisco, without a collar being placed on him, with the name of the owner more or less legibly inscribed thereon. His vote in a great many cases is mortgaged before he is nominated. The Bulletin says:

nominated. The Bulletin says:

He is given a chance to participate in the legislation of the State, provided he agrees to do certain things. In a great multitude of cases he is no more a freeman than a Coolie. The Senators and Assemblymen are merely mariomettes, who are operated by unseen wires. The Legislature is not in session in the place where it is supposed to deliberate. At the last Legislature, when Buckley jerked a string, a majority of both Houses were brought to their feet.

The most effective way to put a stop.

most effective way to put a stop to this state of affairs would be for re spectable citizens to take the prelimwork of elections out of the hands of the venal element which now so largely controls it. Reform must begin at the primaries. The peniten-tiary is also an a may of reform not to be ignored,

MORE LIES ABOUT CALIFORNIA.

The Chicago Herald, which we have always taken to be a well-informed paper, published a remarkable edito-rial on California a few days ago. The text of the article is a statement made a New York paper—which statement is, so far, probably correct—that no less than fifty-eight murders have been committed within the limits of that city during the past two years, and that only two of the perpetrators have been convicted of murder, both being Chinamen. The statement then goe on to assert that from 50 to 75 per cent.
of the adult males constantly carry concealed revolvers and knives, some taking a small armory of assorted weapons about with them; that a large number of women also carry pistols, and not a few use them o very slight provocation; and that children invest their pocket money in pistols and knives, as soon as they are above playing with dolls and marbles.

s is undoubtedly much exaggerrated, even for San Francisco. That from one-half to three-fourths of the adult males of that city constantly carry concealed weapons is obvious an absurdly exaggerated statement. But when the Chicago Herald goes on to speak of the rest of the State, it gets still further from the truth. It says that, bad as the showing of San Francisco in relation to murders is, that of the State outside of it is much worse—that the proportion of murders is twice as large outside of San Fransisco. Such an assertion as this we believe to be altogether beyond the pale of truth. San Francisco is noto rious for its deeds of violence, abound ing as it does in lawless hoodlume and Chinamen, but to charge that the entire State shows homicides equivalent to one a year for each seven hundred amilies which is what this charge

means—is an insult to California. It is in the closing paragraph of this article, however, that the Herald works off its most remarkable statements. It

It is easy to explain why there are so many murders in California. There is little fear of the law in a country where every white person who kills another is acquitted. Making a hip pooket in the short trousers worn by small boys and in the dresses of girls who still array themselves in abort frocks, and giving them money to supply themselves with dirks and revolvers, is quite certain to lead to crime. When more than fifty deadly weapons are found on the persons of the pupils in one schoolroom, the presumption is that the owners of them will use them. Probably a climate that is favorable to raising oranges is also favorable to raising rows and the use of deadly weapons. People who spend much time in the open air are much more likely to commit crime than those who remain in the house. There is a very close relation between climate and crime.

It is really difficult to treat these re-

It is really difficult to treat these remarks seriously. The idea of estab-lishing a close relation between climate and crime, between oranges and out-rages, is exceedingly funny. If a fine rages, is exceedingly funny. If a fine climate tends to make men criminals, then per contra, the inhabitants of Chicago should be among the most virtuous upon the face of the earth, but we have heard travelers say that such is not the case, and we know that the city by the lake is the chosen home of anarchy. Moreover, if there is truth n the extraordinary doctrine of the Harald that "neonle who seemd much Herald that "people who spend much time in the open air are much more liable to commit crime than those who remain in the house," then we ought to find more criminals among policemen than among burglars, for the former are all the time in the open air, whereas the latter spend much of their time in the seclusion of bank vaults. Again, according to this rule. the agricultural class should furnish the greatest proportion of criminals of any industry, which is notoriously not the case.

The arguments of the Herald are very silly, but as they are intended to cast an undeserved stigma upon the Golden State and thus scare some simple-minded people away from set ling here, we cannot permit them to go altogether unnoticed. There is undoubtedly far too much crime in San the lax administration of justice there but the State at large will compare favorably with any State in the Union for safety and respect of law. More especially is this the case in Southern California, which has been largely settled by a highly intelligent and moral class of of eastern people. Take, for instance, Los Angeles. Outrages against life and property are certainly as rare here as in any city of the same size in the country-probably more rare than in 90 per cent. of them. About all our police department has to do is to take care of somebody who has imbibed to freely, or to arrest some "heathen for some unlawful practices peculiar to that nationality. Very few indeed of our male citizens carry any more dangerous weapon than a pock-et-knife, and as for the ladies—God bless 'em!-we don't believe there is one in Los Angeles who could produce anything more deadly than a hairpin.

The San Francisco correspondent to rhom the Chicago Herald refers evidently exaggerated for the sake of writing a spicy article, but the Herald should have known better than to pile further exaggeration on the top of that, and then to cap this Eiffel tower of misrepresentation by such absurd conclusions. Our Chicago contemporary owes the people of California an apology.

BEFORE a committee which has been nvestigating the New York health department several milk dealers swore that the health inspectors of milk demanded money for immunity from in spection and, when the demands were refused that the dealers were arrested their milk destroyed, and they were continually harrassed by strikers. Is it not enough to make one's blood boil to find men in office who are willing to see infants poisoned by adulterate milk, or starved by milk that is watered, in order that they may earn a few dirty dollars? What are we coming to, when men who consider themselves highly respectable will stoop so low?

CHICAGO is bound to take the lead. CHICAGO is bound to take the lead.

She is not satisfied unless she is ahead of all creation. She proposes now to terested in any sprays or washes.

The Sacramento Bee thinks that Frank Coombs of Napa is the probable Republican nominee for Lieutenant-Governor.

Senator J. H. Greeley of Yuba is spoken of for the position of Lieuten-ant-Governoron the Republican ticket. C. C. Wright will be boomed for Con-

The Fresno delegates to the Demo cratic State Convention will work for the nomination of J. D. Spencer for Clerk of the Supreme Court.

J. B. Stetson, Wendell Easton, Republicans, Fleet F. Strother and Colin M. Boyd, Democrats, are candidates for Mayor of San Francisco. In the last Oregon Legislature the

Democrats had nine members; in the next they will have thirty. The Re-

publicans, however, will have sixty. The San Francisco correspondent of the Stockton Mail figures out the prob-able standing of the delegates to the Democratic State Convention thus: Coleman, 265; Pond, 102; English, 56; Murphy, 41. San Francisco and Los Angeles are given by him to Coleman.

"The Undertaker" in the Stockton Mail says of Mayor Pond: That his is one of the most notorious instances of one of the most notorious instances of under-assessment in the State. He is a man worth a million at least, and his assessment in Sail Francisco, where all his stocks, honds, notes and personal property is held, is less than twenty thousand dollars. Pond is one of the worst tax-shirkers in the State. He is a large lender of money on notes of hand at 3 per cent. per month, yet no one ever saw any mention of such securities in his schedule. His lands in the interior are, of course, assessed. in the interior are, of course, assessed, for they cannot escape; but it is safe to say that he does not pay one-tenth of the taxes that he would if he made an exact statement of his assets.

THE APOTHEOSIS OF GUSH. The Jenkinses of the San France Press Outdo Themselves,

[Sacramento Bee.] The apotheosis of gush, the ultima thule of slush and the south pole of sickening sycophancy were all reached in the San Francisco papers of yesterday in the accounts of the Oelrichs-Fair wedding. Miss Tessie Fair, that was, is a good, ordinary, sensible California girl—nothing more. She is not a Venus in beauty, nor an Aspasia in intellect.

The Fairs have never set t

There are few residents of California more prominently identified with the State and its public interests than ex-Senator James G. Fair, father of the bride. A man of irresistible energy, consummate skill and unwavering perseverance, he has placed himself in the foremost ranks of the distinguished financiers of the country. And not only as a money-maker of unusual ability has the ex-Senator made a name for himself, but also as a stateman and philanthropist.

The above is relieved from nausea by being so entirely laughable. As a

The above is relieved from nausea by being so entirely laughable. As a statesman ex-Senator Fair undoubtedly takes high rank with "Sconchin" Maloney, while as a philanthropist the memory of the late Michael Reese loses some of its luster in comparison. But the Examiner outdid itself in slobbery. It had pictures of nearly all connected with the affair, It had the bride, the bride's mother, father, sister and brothers, the bridegroom, the bridesmaids, the groomsmen, the ushers and the priests. It unfortunately forgot one important elementic omitted to publish-pictures of the chambermaids who made up the nuptial couch.

Who Preach Only to Please— A Side-slap at Revision of Creed.

By Telegraph to The Times.
PRINCETON (N. J.,) June 8.—[By the Associated Press.] The exercises of the one hundred and forty-third annual commencement of Princeton College began this morning with the laureate sermon by Dr. Patton. Speaking of the study of the Bible and the methods of its interpretation, Dr. Pat-

ton said, in part:

There are men who stand in our pulpits and preach on the patience of Job and the moral courage of Danlel, who find material for sentimental and entertaining sermons on the social follies of the day, and practical sermons on the importance of sleep or the need of restraining the imagination, but who are slient respecting the tremendous fact of sin and the dogmastic significance of atoning blood. I do not say that such men are handling the word of God deceitfully, for I am willing to have them plead gullity, if they prefer, to the literary incapacity and our unscholastic stupidity that prevent them from seeing that the bleeding Christ is the central fact of the Scripture. Cultivate discrimination, seize upon master thoughts, get hold of the big end of all questions, rest your opinions in broad and deep rational foundations, follow the great trend of the evidence and do not half for minor difficulties, and do not let trifles feed doubt. We formulate our faith in the creed statements, and after a century or two, find that church and credates not be asset accord. There ton said, in part: what is, rether than of what ought to be, and that if the doctrine that is right succeeds at all, if is the determination, that what is, is right. In the name of reason, I protest against this tendency in thought, it refused to abdicate under the terrorism of popular sentiment. Historic movements as well as the actions of individuals, must be gauged by fixed principles. We cannot eliminate doctrines because we do not like them, nor can we insert new ones ourselves because popular clamor calls for them. What is written is written, but it will be read with different emphasis in different periods and will be interpreted in the light of the burning questions of these periods, and will be brought into relation with science and philosophy. Do not hastily assume that every great movement is an inspired movement. I have no faith in the inspiration of large masses of men.

The Tory Plan for Rushing Irish Measures Through the Com-mons-Another Revolt In Zanzibar-Notes.

By Telegraph to The Times London, June 8.-[By Cable and Asociated Press. | The Anchor line steamer City of Rome arrived at Queenstown this morning. The vessel had a narrow escape from destruction at Fastnet. She made land in a dense fog at 4 o'clock this morning. She was going slowly and taking soundings, when, notwithstanding the care exercised, she struck Fastnet Rock about three miles seaward, off Crookhaven, bow in. Her forefoot got on the rock, and, but fer prompt reversing of the engines, great fatality would have

been recorded.

The passengers say that the steamer trembled all over when she struck the rock. For a time there was great alarm on board, the density of the fog adding to the ominous character of fog adding to the ominous character of the situation. The passengers were finally quieted by repeated assurances of the commander and other officers. The full extent of the damage will not be ascertained until the vessel is docked. Her stem is broken at the peak, and she shipped a large volume of water forward. The steamer started 12 for Liverpool at 11 o'clock at half w speed.

Wilson Barretthas a brother, George, who is a member of his company, and who appears to be, according to the judgment of many critics, a good actor, too. Miss Eastlake's claims to admiration have also been conceded by the press and the public. The San Francisco engagement now being filled by this company is drawing full houses, and there has been a continued succession of social attentions shown to the distinguished actor and his principal support. It has become a recognized custom in San Francisco society to showathese attentions to actors and actresses who are above the ordinary rank, and any one, or more, of our local society leaders has a chance for fame, more or less ephemeral, in being the first to institute such an order of proceeding here.

The programme for the Wilson Barrett engagement is varied and attractive, comprising Claudian, Ben My Chres, Silver King, Lady of Lyons and Hamlet.

I have a great admiration for the bright fellows who can write bright paragraphs. A column of paragraphs is a column of suggestions; it should be worth as much money to the writer as a serial story. What makes a dictionary so valuable? Nothing but its short, crisp paragraphs. I used to write like a favorite contributor to a dictionary. But now I pine for change. I want to write speeches, like the great and good Senator Blair, and long poems, like George W. Homer. In fact, I want to do something I can't do. Jevver feel that way? I reckon that must be the restless strivings of ambitton. I never had ambitton—I was vaccinated when I was a boy—but I reckon that is what it feels like.

#### BARNUM ON HIS HOBBY.

#### Story of His World-wide Circus Experiences

TOLD BY THE SHOWMAN HIMSELF

The Secret of National Happiness The Elephant as a Moral Force
— European Circuses — The American Ring.

[COPYRIGHTED, 1890—FOR THE TIMES.]
That the love of amusement is inherent in the human race hardly admits of doubt. Of the many defini-tions by which man has been described one is that he is "the animal that laughs." Some one has said, in reply to this, that there are other animals that laugh. But, strictly speaking, this is probably not true. The hyena's laugh, at any rate, is not hilarlous, nor is the parrot's imitation of laughter anything—except in form—like the genuine article.

It is a valid plea for amusement, for enjoyment and laughter, to say that all nations have provided for these things. The Grecian and Roman games are as famous as anything else we know of in Grecian and Roman history, and the unburied walls of Pom-

we know of in Grecian and known instructions, and the unburied walls of Pompeli reveal to modern eyes the placards of theatrical and public shows. In Rome, in times of public clemor, the appeal for bread, as the Latin motto shows, was coupled with that for amusements; as if it were on an equality with and as necessary as the other.

I think it will be found true that, in any nation where a genuine love of amusement prevails, and where wholesome and rational amusements flourish, you will find a peaceful government and a people that is contented. I believe that if the Czar of Russia should organize monster shows and rilliant spectacles all over his empire, he would to some extent mitigate the brooding sorrow of his people. I do not mean that joy can take the place of justice; or that injustice should have even this support. But if I were committed to dispensing wrong I should see, I think, that some mitigation of it could be had by promoting gaiety and pleasure.

The growth of the public show in

The growth of the public show in The growth of the public show in this country arose from quite primitive beginnings. Fifty years and more ago the performing bear or single elephant was enough to draw a crowd. The elephant—when he was a show by himwas enough to draw a crowa. The elephant—when he was a show by himself—was driven around from place to place in country towns. It was the habit to take him by night as much as possible; and when he went along the country roads by day he was closely blanketed. He was generally exhibited in a barn for a small fee; and as soon as the eyes of the crowd were satisfied the doors were closed, and the next morning the trainer and keeper, with an assistant, drove him on to another town to repeat the exhibition. By degrees certain other attractions were joined to the exhibition of the elephant. There were ventriloqual performances, sleight-of-hand tricks, a little magic, and flusily the large tent, circus-rider, street procession and clows.

was a French showman, said to the agent:

"You can't break up my show, for my wife, my two sons and daughter are among my performers, and you can't hire them. Nor can you buy the black ponies, for they are mine, too,"

"But," said the agent, "you will sell the horses at some price?"

"No, I won't, either."

"Why, yes, you will, at some price."

"Why, yes, you will, at some price."

"Or son,000."

"I'll take them," he said, triumphantly, "for \$90,000."

"I'll take them," said the agent.

"O, you don't mean it! You will break up my show."

But the bargain was made, and there was no help for it. But it is partly the wealth in this country and the good parronage of Americans that enables us to do so much better here with the abow as a business. There is performer, and then set his house on fire and burned it to the ground. Grass valley saloons must be selling genuine fire-water.

all over the world, and we have to go all over the world after it.

It may interest the reader to know that a wonderful lady rider, called the best in the world, and who jumps from the ground with her feet alone, isnding on her feet on the back of the horse at full speed, is from Buence Ayres, South America. Her salary, if I were to name it, would be found about equal in one week to that of high-class clerks in a large mercantile firm for one year.

You have asked me to tell you how performers are made. Well, like journalism, which is its own school, the circus is mainly its own school. You have got to do the thing to know how. Of course, some gymnasium practice is apt to precede the public attempt. But

cus is mainly its own school. You have got to do the thing to know how. Of course, some gymnasium practice is apt to precede the public attempt. But some performers who have taught themselves wholly in an amateur way, begin at once with the smaller circus feats, and go on by years of practice to success. Not every one, however, who tries can be a successful gymnast or acrobat. Nature, in this, as in every thing, has to do its part.

A marked difference between English circuses and the best in America is seen in the way the programme is handled after the opening hour. We begin with a spectacular and lively promenade around the ring. And, after this, specific performance or series of specific performances follow quickly. The English way, however, is to open slowly, the ringmaster coming in with a long whip in his hand and with perhaps one or two performers only following him a minute or two later. The whole manipulation of the exercises as the English do it—would be slow and tedious to us.

Our three rings are a revelation and wonder to English and European eyes. No circus managers in England or abroad ever thought or heard of more than one ring. But they are probably teachable and know at least their own interest. Having seen the egg set on end, they will undoubtedly follow a good example and reap from it greater patronage hereafter with greater profit.

wites the swift coming of old age and decay.

Says a recent writer:

The portraits of beauties of the time of Washington's inauguration show the flighest feminine charms of wit, freeling, heart and mind in faces which wore their bloom stanebly up to 50. Mrs. Jay, daughter of Rufus King, with her black hair and briliant blue eyes; Mrs. Bayard, whose pictured face it is impossible to see and not to love; the faithful, frank wife of Alexander Hamilton, who could have kept her gaisant husband from his erring ways had she been more of a woman and less of a model—these and the beey of Philadelphia beauties kept their looks delightfully up to the line of 60 and remained lowable into a of the Duchess de la Villiers, who at 50 was still marvelously beautiful, that Nature, prodent and wise, forest time to respect the charms as its poweriess to respect. SUSAN SUNSHINE.

Séraphine Douba, a negress of the island of Bourbon, was among those who received prizes for faithful service from the French Academy. She was born a slave and belonged to a family named Planta. She brought up three generations of her master's family, and when the emancipation came she remained by them. At the end of fifty years a change came in the fortunes of the Planta family, and one day the great-grand-daughters of Séraphine's first master found themselves penniless. Séraphine, however, refused to be discharged, and has never accepted a penny. Ever since, after her day's work, she has gone into the town to offer her young mistress, needlework for sale at private houses.

the benefit of Company B will be given in the opera-house next Thursday evening. The performance is being arranged under the direction of Mrs. Riggins, who will be assisted in its production by several members of her accomplished family. The mere announcement of the appearance of these artists should be sufficient to fill the house.

The fact should be kept in mind that this is the first effort that has been ande by Company B to obtain financial assistance from our citizens. Whatever profit may result will go toward purchasing tents and necessary equipment for the State encampment, which will be held at San Diego in August, and for which the State provides no appropriation. The company is a credit to the town and deserves liberal support.

Reserved seats will be placed on sale this morning at Foster's. All tickets purchased from members of the company must be exchanged here for regular opera-house tickets. Reserved seats may be obtained without extra charge.

### Work on the Census.

One of the local census enumerators told the TIMES reporter yesterday that the work is progressing satisfactorily, and that Pasadena will probably be counted by the end of the week. The questions are for the most part readily answered, although in some cases considerable tact has to be exercised by the census man. The greatest difficulty lies in getting the questions satisfactorily answered by foreigners who have acquired little or no knowledge of English. The European element in Pasadena is made up largely of Germans and Italians. There are also Chinese in considerable numbers. the work is progressing satisfactorily,

Interesting Programmes Rendered by the Sunday-school Children —Handsome Decorations— Large Audiences.

a sermon to the children in the morning, preached by the pastor, Rev. E.

L. Conger, at which service four little
ones were baptized. At 6 o'clock in
the evening a large-sized audience
gathered in the vestry, which, from its
construction was a charmingly cool
retreat after the heat of the day.

There, with the rostrum decked with
branches and ilowers, above which
were pendant cages in which birds
twittered and sang rich songs of praise,
was rendered an interesting programme, entitled, "Branches, Buds
and Blossoms," It consisted of recitations, readings and songs, with solos
and chants by the members of the
Harmonia Quartette. All was well
rendered but a recitation given by six
young misses, each of whom recited a
stanza of a poem entitled "God in
Flowers," is deserving of special mention; also the closing recitation with
tableaux illustrating the "branches,"
"buds" and "blossoms."

At the First Congregational Church
the day was observed by a Sundayschool concert in the evening, the
theme of which was, "Room for the
Children." After singing and scriptural reading by the school and prayer
by the pastor, "Our Festive Day, Returning" was sung by two classes. A
recitation entitled, "Children's Day,"
and rendered by four of the scholars,
followed. Three of the children then
recited, "Where Is There Room for
the Children?" Members of the infant
class, all wee tots, who did surprisingly
well considering their age, gave the
first response, entitled "In the Great,
Loving Heart of Jesus." Other responses followed in the form of recitations or dialogues and interspersed
with singing, thus rounding out a
beautiful and well-rendered service.
The morning service at the Presbyterian Church was devoted to
Children's day exercises, which were
of an interesting character and enjoyed
by a large congregation. Miss Coleman played an opening voluntary with
characteristic force and expression.

After the doxology and an invocation,
the school sang, "Again the Day of
Gladness." Rev. Dr. Ormiston offered

of Jerusalem." The classes then made their offerings. After a song by the primary class, the pastor delivered an interesting address to the children, which was followed by the closing hymn.
"Our Grand Army Review" was the

hymn.

"Our Grand Army Review" was the title of the service rendered yesterday evening in the Tabernadle by members of the Methodist Sunday-school. The exercises consisted of recitations, responsive readings and singing, all of which were well rendered. A. E. Vesper led the pastoral division, Miss Sarah Prentiss was at the head of the literature division and the church society division was led by Miss Jessie Grey. Matthew Holmes was at the head of the Epworth Guards, and the junior army was generaled by May Barnhart. Amy Doty represented our little crusaders, and the three speakers in the educational division were Will Pinney, Blanche Johnston and Frank Stevens. The Tabernacle was prettily decorated. A collection was taken up to be devoted to the educational interests.

Look at a nunbeam where it comes streaming through your window and notice the millions of atoms of dust that it contains. You do not see this dust except as it is made visible in a sunbeam. Then think how many thousands of millions of smalles animals there must be in every breath drawn into the lungs, and not one of which can is seen! But they must live, and they do live upon that portion of the human body which trey can get at. This is malaria. It is all wonder that nearly every man and woman is froubled with it? The ladies' snuex of the Chamber of Commerce will hold its regular weekly meeting at 2 o'clock this afternoon. Matters of importance will come up.

There was quite a change in the temperature last evening. The thermometer dropped down to 60°. Night before last at 7 o'clock the temperature was 80°.

The City Council will meet this morning in regular session. There are chances for a lively fight over the appointment of a Police Commissioner to fill the place made vacant by the death of George C. Knox.

The San Bernardino asylum trustees left on Friday for the north on a tour of inspection among the insane asylums. William Curlett of Los Angeles, who has been selected as architect, accompanies them. On July 1st the Gurney Cab Com

pany will issue an accurate miniature map of Los Angeles, showing the cor-rect distance to all parts of the city, together with a new tariff sheet. It will be of great interest to the public. An adjourned meeting of the Board of Directors of the Chamber of Commerce will be held at 3:30 o'clock this afternoon. A delegation of five will be elected to attend the railroad convention which convenes in San José on the 25th inst.

It is safe to say that the great ma-jority of people in the city who could get away went to the sea coast yester-day to cool off. There were probably ten thousand people at Santa Monics, and the other watering places also did a large business.

The Sprinkler Needed. Some of the side streets in this city re so dusty that it is almost imposs ble for teams to pass, and the shrub-bery is suffering to a considerable ex-tent from the dust which settles on the trees. The people who own prop-erty on these streets pay their share of taxation to keep up the sprinkling carts, and they think they should be treated fairly.

Highest of all in Leavening Power. -U. S. Gov't Report, Aug. 17, 1880.

ABSOLUTELY PURE

There is nothing comparative or hesitating in their language when the official analysts, chemists and scientists speak of the quality of the Royal Baking Powder. "As good as," "harmless," "pure" are tame phrases to describe the superlative merits of this great baking powder. Whenever actual, scientific, practical tests are made, it is emphatically declared superior in its leavening strength, purity and wholesomeness. Witness the report of Prof. Wenzell, of the College of Pharmacy Department, University of California:

SAN FRANCISCO, Oct. 19, 1889.

From actual analysis made by me, I pronounce the Royal Baking Powder to be the Strongest and Purest Baking Powder before the public.

It is entirely free from alum and other additions injurious to health.
